INVESTMENT THESIS

Create a Simpsons ETF that is based on last weeks episode. Please give investment recommendations weekly based on the ongoing episodes. Please detail to me why you are recommending the assets whether to buy or short. Make sure the Risk profile is aggressive and the time horizon will be 5-10 years. I want the ETF to be based on what the episode showed last week whether verbally or within the episode (images, icons, food/beverage, technology, and anything else that you deem as investment worthy). Please be creative but not too creative.
